# Echo Valley Environmental Nature Trail

This two and half mile trail is located in the heart of Echo Valley State Park. Explore the 100-acre natural area located 2 miles southeast of West Union, Iowa.

You will find historical structures like keystone archways, lime kilns, a dam and shelter house that the Civilian Conservation Corps built in the 1930's.

The main trail is gravel based and suitable for walking, jogging or biking. You will also discover side trails perfect for hiking or off-road biking. Along the trail you'll see a petting zoo, wildflowers, and ample opportunities for bird watching.

The park also provides visitors with picnicking areas, primitive camping, and 2 trout streams; Otter Creek and Glovers Creek Fishing and Wildlife Area.
